Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5 and 11-18, drawn to a card storage system, classified in class 40, subclass 404.
 - II. Claims 6-10, drawn to a method of making card storage system, classified in class 29, subclass 428.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as by making the rails in the form of blades, pushing the bladed rails up against the business card holder to form slits in the lower portion of the holder in order to removably attach the holder to the rails and attaching a business card to the card holder.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3611

4. A telephone call was made to John J. Connors on Aug. 20, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian K. Green whose telephone number is (703) 308-1011. The examiner can normally be reached on Monday-Friday from 7:00 a.m. to 3:30 p.m.
